N. C. Railway,  
Allahabad

Sub:-System Improvement for Leveraging of Technology in Scrap Delivery.

After the conduct of successful auction and issue of Delivery Order by Auction Conducting Officer, the request letter for delivery of sold lot is submitted by the purchaser in the Divisional Office or Workshop/Shed/Depot for their respective lots. Accordingly, after consultation with Stock Holder, RPF and Accounts departments, the letter for fixing the Delivery Date is issued. A copy of this letter is also sent to Vigilance Department, based upon which routine preventive checks are conducted. It is observed that quite often such letters are received in the Vigilance department at the fag end of delivery date – particularly from distant locations and sometimes even after the delivery date which obviates the purpose of conducting preventive checks. Timely sharing of information with all stake holders is also required in the best interest of administration.

It is therefore, suggested that an Application may be developed in consultation with CRIS or local agency, so that this information in particular and other sale related information, may be conveyed online to all concerned stakeholders as well as Vigilance department.
