

Auto CRAC

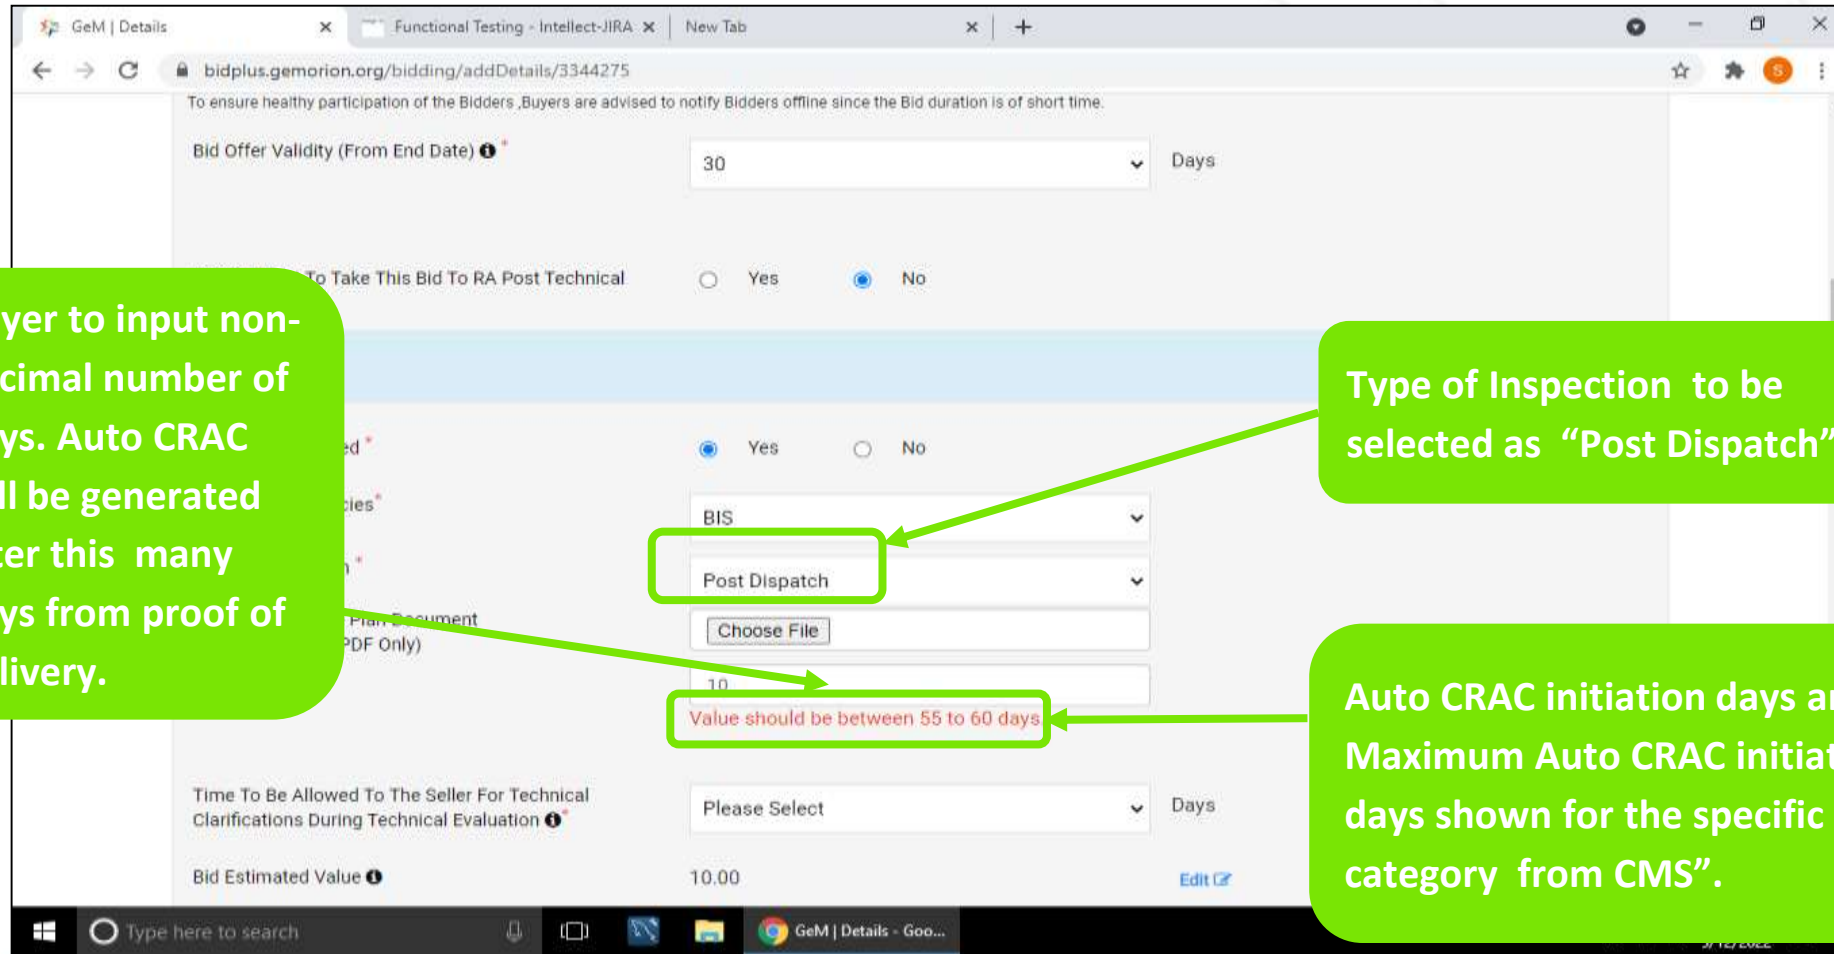

Overview

- As part of the bid creation process, on the bid details page, buyers may enter a non-decimal number of days against Auto CRAC days if the inspection type is "post-inspection dispatch".
- CMS (Catalog Management System) allows the configuration of Default and Maximum Auto CRAC initiation days per category. These limits are displayed for the primary product category under "Auto CRAC days" in the bid details page. The buyer must select within this range, and Auto CRAC Notification will be triggered based on Auto CRAC Days inputted in the Bid Details.
- Auto CRAC notifications should be triggered taking into consideration the buyer's input

Overview

- The number of days input is when the system generated auto CRAC should be triggered from the date of proof of delivery submission by the seller.
- If the buyer does not enter the "Auto CRAC Days" then the "Default Auto CRAC Initiation Days" from CMS will be used by default which is 10 days. Moreover, if "Maximum Auto CRAC initiation days" is not available in CMS, then "Auto CRAC Days" will be set to 60 days by default.
- Buyer's input for post-dispatch inspection should be published on the bid and contract document.
- Auto CRAC notifications should be triggered taking into consideration the buyer's input.
