SIV-29/2023

Date- 28.11.2023

Letter No.-2023/02/01880/PC/V3/N/ALD

Principal Chief Commercial Manager,
North Central Railway,
Prayagraj.

Subject- Preventive check conducted on the special cancellation in PRS office.

In connection with the above mentioned subject, in a preventive check, it was noticed that in cases of special cancellation of PRS, only details of cancellation entries are made in special cancellation register and no proof of causes or actual rectification details of the same are kept for genuineness verification. In such cases the genuineness of anomalies can't be checked based on the entries made in the register.

In order to keep the system more transparent and to avoid any malpractice, it is advised to keep the screen print outs of the 'error/anomaly page and 'rectified page' in the same register so that genuineness of the case may be ascertained and any malpractice can be avoided.

This has the approval of SDGM.
