CRIS, New Delhi**

(Kind attention- Shri Rajaram Prasad, GM (iMMIS & EPS), CRIS)

Sub:- Inventory Management System for consignees of consuming departments.

It has been found needful for long time that there should be online web based application for Inventory Management System at consumer department's stores for managing stock / non-stock items received from various sources.

In view of above, CRIS is requested to provide an extension and make necessary provisions in iMMIS to incorporate the following features:-

1. Receipt and accountal at consumer department's store for all kinds of materials stock / non-stock / etc from all kinds of sources like Stores depots, vendors against POs and assistance from other Railways/units etc..
2. Their stocking and issue against a voucher (hard copy) / online request raised by actual user of that department.
3. Auto updating of inventory balance.
4. The updated position in desired reports format should be available on user panel across NCR.

General Manager, NCR has already directed to Mechanical, Electrical, S&T and Engineering (optional) departments to nominate atleast one consignee in each division, work shop and shed so that best working practices may be incorporated in the pilot project before complete implementation of subject system across NCR.

CRIS may kindly interact with this office for any assistance in this regard to develop it as early as possible.
